

HazVault™

HVCO30PP

CORROSIVE STORAGE CABINETS

1. Small enough to allow locating cabinet on top of work bench.
2. Suitable for most corrosive substances including aggressive acids, such as sulphuric acid, hydrochloric acid, nitric acid and many others.
3. Constructed from 15mm thick gloss finish white polypropylene material in all walls, floor, roof and door.
4. Single door with rebated edging provides a flush finish to the front of the cabinet.
5. Includes one storage bottom shelf also made from the same white 15mm thick poly material. Even the shelf supports are made from the same material.
6. Spring tensioned hinges provides self-closing door action with self-latching door handle. Handle includes key lock and internal opening latch.
7. 150mm deep liquid tight sump for spill collection.

Product Specification
