

FORGED D-RING

EN 362:2004

A Forged D-Ring is a critical component in fall arrest systems. It serves as a secure attachment point on a safety harness, lanyard, or anchorage connector, and is designed to withstand the high forces generated during a fall.

Product Specification

Product Name	Forged D-Ring
Material	Alloy Steel
Finish	Golden Passivation
Weight	102.0 Grams
Minimum Braking Strength	23 KN
Confirms to	EN 362:2004

SKU Information

Product SKU	Inner pack UPC	Carton GTIN
BLSH-FP-DR01	XXXXXXXX	XXXXXXXX

Applications

- Harness
- Lanyard
- Anchorage
