

O-RING - SMALL

EN 362:2004

An O-ring in a fall arrester system is a type of connection ring used to safely link components of personal fall protection equipment. It's not the rubber gasket type seen in plumbing—this is a metal ring, often circular (hence “O”), used in harnesses or anchorage systems.

Product Specification

Product Name	O-Ring - Small
Material	Alloy Steel
Finish	Golden Passivation
Weight	46.5 Grams
Minimum Braking Strength	23 KN
Confirms to	EN 362:2004

Applications

- Rope Access
- Rescue
- Mountaineering
