## SNAP HOOK

CE

EN 362:2004

A snap hook is a connector with a spring-loaded gate that automatically closes and locks when released. In the context of a fall arrester, it's designed to:

- Attach securely to anchor points, lifelines, or harness D-rings.
- Resist accidental opening, even under load or impact.
- Often self-lock or require a double action to open, for added safety

### Product Specification

Product Name	Snap Hook
Material	Alloy Steel
Finish	Silver/ Yellow/ Golden Passivation
Weight	205.3 Grams
Minimum Braking Strength	23 KN
Confirms to	EN 362:2004

### Applications

- Rope Access
- Rescue
- Mountaineering
