

SWIVEL HOOK WITH INDICATOR

EN 362:2004

A swivel hook is a snap hook with a rotating (swivel) base, designed for use in personal fall arrest systems. The swivel feature prevents twisting or tangling of lifelines and lanyards, improving safety and comfort for the worker.

Key Features

- Prevents lifeline twisting: Ideal when the worker is moving frequently or rotating during tasks.
- Reduces trip hazards and wear: Keeps lines from knotting or binding.
- Improves alignment: Ensures the hook stays aligned with the load direction, reducing side-loading risk.

Product Specification

Product Name	Swivel Hook with Indicator
Material	Alloy Steel
Finish	Golden Passivation
Weight	345.5 Grams
Minimum Braking Strength	23 KN
Confirms to	EN 362:2004

Applications

- Rope Access
- Rescue
- Mountaineering
