

FLAMMABLE STORAGE CABINETS

One of the leading causes of industrial fires is improper storage and handling of flammable liquids. Requirements for handling and storing chemicals are complex and depend on the flammability of the liquid. This model is constructed from solid 18 gauge (1.2mm) thick steel double wall construction with 38mm of insulated air space for fire protection. Shelves designed to direct spills to the back and bottom into a 2-in (51-mm) leak-tested sump that meets EPA requirements. Adjustable on 3-in (76-mm) centers. Fully welded and riveted construction keeps the unit square for longer life and provides better protection in a fire due to reduced air gaps.

The cabinet also features dual vents with flame arresters, four adjustable self-leveling feet, and a built-in ground connector. Its durable lead-free epoxy/polyester powder-coated finish provides excellent internal and external chemical resistance and minimizes the effects of corrosion and moisture.

All BisonLife cabinets come with a 10-year warranty. It meets OSHA, NFPA 30 and NFPA 1 requirements.

Product Specification

Color	Yellow
Capacity	22Gal/83L
Material Specifications	18-Gauge Steel
Number of Doors	1
Door Type	Manual
Number of Shelves	3
Dimensions, Exterior	60x46x165cm
Dimensions, Interior	52x38x154cm
Net Weight	80 kgs
OSHA Compliance	Yes
Complies with NFPA Code 30	Yes

Industries
